See [Alerts Help](#) for Information on the Alerts Service

Try our Basic Search

- Just type in your key word(s), like "global warming," and select .
- You'll get results ranked by relevance. The higher the number of stars,  the more relevant the document is to your query.
- You will also see [Clusters](#) of results on the left side of the screen. On the right, you will see the related [Wikipedia](#) term, as well as related [EurekAlert!](#) news items.
- Unlike many search engines, results are retrieved in real time. So as results start to come in, you may want to select "Add Results" to update. You may work with your results while MultiSearch continues searching.

You want a more Targeted Search? Try our Advanced Search

- You can customize your search by checking selected databases and Web sites.
- You can search Full Record, Title, Author, Source Summary, Keywords, and Date Range.

- Full Record will search the entire content of a document, when available.

Match:

- You may .
This allows you to decide how the search operates between fields.
 - ALL (AND) is the default, and finds results with terms occurring in *all* fields where you have entered a search term. This is to help Boolean users.
 - ANY (OR) finds results with terms occurring in *any* of the fields where you have entered a search term.

- Date Range allows you to search one or more years in the ‘Pick Year’ drop-down boxes.
 - Leaving the boxes blank is the default, and will not use a date in the search.
 - Selecting different dates in the ‘Pick Year’ drop down boxes will search the specified range; you must select both a starting Pick year to an ending Pick year date. Only selecting one date will generate an error message.
 - Selecting the same year in both pick year boxes will search a single year.
 - Selecting only the ‘To’ pick year will search any year including and prior to the year selected
- Categories or individual sources can be selected for a specific search. Select the  to view individual sources for selection. Click All Sources to de-select categories/individual sources and select the ones you want to search.
-  runs the search.
-  clears the search terms in all fields and reverts to default settings.

Search Results

Your results will appear, in order of relevance, in the middle section of your screen.

You will also see results grouped under these headings:

Clusters

- Under the heading Clusters, at the left of your results page, your results have been grouped into topics related to your search term.
- Clustering can help guide you to needed results by grouping result documents into meaningful sets.
- Just select one of the topics or years, and you will see those results, also relevancy-ranked.

Wikipedia

- If Wikipedia contains an exact match for your term, it will be provided on the right of your results page, along with a link to the complete Wikipedia entry.
- Wikipedia is a multilingual, Web-based, free content encyclopedia project.
- More information is available on the [Wikipedia](http://www.wikipedia.org) Web site.

EurekAlert!

- EurekAlert! news items related to your search term will be provided on the results page in the right column under the Wikipedia result.
- EurekAlert! is an online, global news service operated by AAAS, the science society.
- More information is available on the [EurekAlert!](#) Web site.

Your May:

The image shows two search filter dropdown menus. The 'Limit to:' dropdown is set to 'All Publishers' and is open, showing a list of options including 'All Publishers', 'CRS Reports', 'DOE R&D project Summaries', 'Environmental Protection Agency', 'FDA Center for Biologics Eval & Research', 'FDA Center for Drug Eval & Research', 'Federal Labs', 'NASA Web Site', 'National Science Foundation Awards', 'NIH ClinicalTrials.gov', 'US Government Accountability Office', and 'USDA Forest Service Research'. The 'Sort by:' dropdown is set to 'Rank' and is also open, showing options for 'Rank', 'Date', 'Title', and 'Author'.

- Selecting Preferences on the navigation bar after performing your first search allows you to set your session preferences.

The image shows a 'Session Preferences' dialog box. It has a title bar 'Session Preferences'. Below the title bar, there is a 'Results per page:' label followed by a dropdown menu set to '10'. Below that, there is a section titled 'More Results Available dialog:' with two radio button options: 'Show dialog when search completes.' (which is selected) and 'Do not show dialog when search completes (use the status bar to view more results)'. At the bottom of the dialog, there is a note: 'These preferences only apply to the current session in your browser.' and two buttons: 'Save Preferences' and 'Cancel'.

- Once you initiate your search, you may choose to Add more results.

My Clippings and Clear Clippings

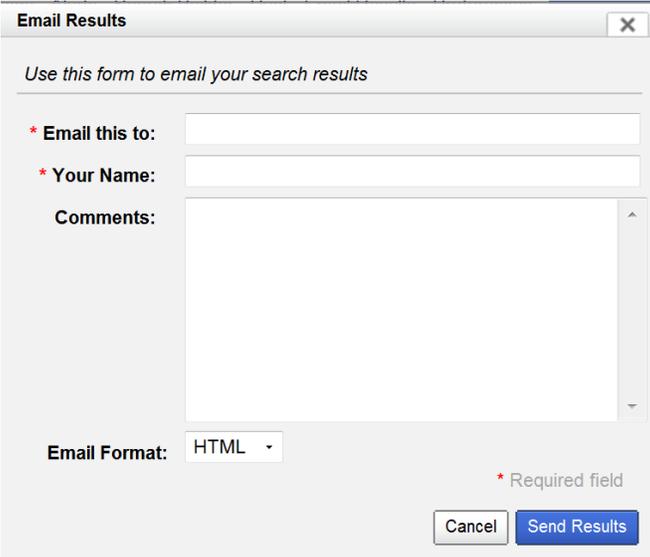

Checking the box next to any result will add it to My Clippings. These will be available for viewing on My Clippings page during your entire browser session, unless you deselect them, or choose Clear Clippings. From the My Clippings page, select “Back to Previous Page” to return to your original result list.

Exporting Results

Available result export options include emailing results, citations export and printing. If you use a bibliographic reader such as RefWorks, you may download the selected results into your citation manager via an RIS formatted download. Your citation manager should automatically display the results downloaded.

Email Results

- The Email Results link allows you to email a set of results to yourself, friends, or colleagues.
- Select Email Results, and enter the required information, indicated by red asterisk:

Use this form to email your search results

* Email this to:

* Your Name:

Comments:

Email Format: HTML ▾

* Required field

Cancel Send Results

- You may select the number and format of the emailed results.
- This function is also available from the "My Clippings" page, where you can email specific, selected results.
- If you do not receive your email results in a few minutes, check your spam filter.

Citations - Export results into a citation manager

This function is only available from the My Clippings page. You must select results you would like to export into a citation manager from the main set of results, then visit My Clippings and select either Citations Management or RefWorks.

- Citations Management only appears on the My Clippings page.
- If you use a bibliographic reader such as RefWorks, you may download the selected results into your citation manager via an RIS formatted download.
- Your citation manager should automatically display the results downloaded.

Citations Management

Download your selections to your desktop in RIS format.

Save and organize all your selections by directly exporting them to online management systems!!

The first out of the entire list of results.

Collection Status

The **Collection Status** link will present a dialog log showing the responsiveness of each separate source. The ✓ indicates that the search at that particular source completed successfully; the 🚫 indicates that the source was unresponsive. The number in the Ranked column indicates the number of results returned for DTIC MultiSearch. The Available column shows how many additional results are available from that source.

Spelling Suggestion

DTIC MultiSearch will suggest words and phrases when a misspelling is detected. You'll see this in the upper left corner of the results page. Simply select the suggested term and a new search will be performed with the corrected query information.

Search Tips

Queries can include:

- Multiple terms (AND is the default)
Example: *A search on **frogs toads** will return results on both **frogs and toads***
- Expressions using logical operators AND, OR or NOT
Example: *A search on **frogs AND toads** will return results where both frogs and toads appear; **frogs OR toads** will return results where either **frogs or toads** appear; **frogs NOT toads** will return results with frogs and without toads.*
- Phrases, contained in double quotation marks
Example: *a search on **“nitrate cycling”** will return results where the term nitrate is immediately followed by the term cycling.*
- Parentheses, requiring the expression within to be evaluated first
- Wildcards
 - Use * to search for the term with 0 or more additional characters
Example: ***nucle*** will return results with the terms nuclear, nucleus, nucleoprotein, etc.*
 - Use ? to search for the term with only 1 additional character (characters include numbers, letters and punctuation)
Example: ***DO?** will return results with the terms DOE, DOI, DOT, DOG, etc.*
 - Searches are not case-sensitive
Example: ***RAIN, Rain and rain** will produce the same results*

Our searches are powered by Distributed Explorit from [Deep Web Technologies](#). Our results may include full text, bibliographic citations, and other types of material from federal agencies.
